

In an effort to give patients more access to their own information, the New Jersey Medicinal Marijuana Program (MMP) has implemented a **Patient Login** feature to the MMP registry. Patients now may log into **njmmp.nj.gov** using either their active patient number located on their MMP identification card or their reference number located on the attending physician statement.

As an MMP patient you can now:

- Change your current designated Alternative Treatment Center (ATC)
- View your current 30, 60, 90 day certification period
- View ATC visits and purchases
- Update your phone numbers and email address
- View past important emails and messages sent to you by the MMP

Along with this notification, you will have received a set of detailed instructions on how you may access and navigate the patient login section of the registry. The instructions attached are in PDF format and titled: **Login Instructions**. The MMP recommends you thoroughly read the instructions before logging into the registry so you may understand the criteria before proceeding.

If you should have any questions regarding the new login feature, please contact the MMP customer service unit at (609) 292-0424 or email us at medical.marijuana@doh.state.nj.us
